## TECHNICAL BULLETIN

SUBJECT: New Release - PaletteOS 10.6.4	SERIES: Strand Lighting Light Palette™ / Palette™ Consoles
DISTRIBUTION: Authorized Service Centers & Users	STATUS: Routine

## Introduction

### Operating Software Release

Strand Lighting announces the release of Palette™ Operating System (OS) 10.6.4 for all Palette™ and Light Palette™ consoles. This new software is available for immediate download at our web site at [www.strandlighting.com](http://www.strandlighting.com). For detailed information on the new software, please refer to the release notes below.

**Note:** This Technical Bulletin is for informational purposes only. Before downloading and installing any new software, Strand Lighting highly recommends that you save and backup all show files. For assistance, please contact Strand Lighting technical support at 1.800.4.STRAND or 1.214.647.7880.

## Release Notes

### New Version Overview

#### Tracking Backup Disconnect Issue

Modified code to fix tracking backup disconnect on main file save. When a Save occurs, on the Main console, the tracking backup console no longer disconnects.

#### DMX Input Operational Improvement

New USB firmware for DMX input. Improves the user's ability to route DMX input through the DMX ports on the console

#### Missed Keys / Command Line

Fixed missed keys on some Palette hardware. Addresses reports of keys pressed not showing up in the Command Line.

#### Consoles Startup Issues

Fixes possible crash on startup on systems with Quad DMX. Addresses reports of console crashes when the console is powered up on Light Palette consoles with the Quad DMX card.

## For Use With

---

### **Compatible Strand Lighting Control Consoles**

PaletteOS 10.6.4 is for use with the all Palette™ and Light Palette™ Strand Lighting control consoles.

## Revision Summary

---

### **PaletteOS 10.6.4**

---
