TECHNICAL BULLETIN

| | |
|---|------------------------|
| SUBJECT: 250ML CONSOLE FIXTURE LIBRARY CREATOR SOFTWARE | SERIES: 250ML Consoles |
| DISTRIBUTION: General Release | STATUS: Routine |

Introduction

Note: This bulletin is for information purposes only. Users and owners are not required to inspect their 250ML consoles. This is general notification of software performance parameters.

250ML Console Fixture Library Creator Software

The 250ML console and the 250ML Fixture Library Creator Software has a limit to the number of steps in the Non-Linear Channel Information that can be used.

- The limit of number of steps of information is 204.
- Each step of information uses 10 bytes of memory out of 2048 bytes ($2048/10 = 204$ steps).
- Any fixture that is created with more than 204 steps across all parameter's Non-Linear Channel Information shall be ignored when the file is saved.
