

NEO PLAYBACK AND SUBMASTER WINGS

Adding to our NEO family of products are the NEO Fader wings. NEO fader wings can be used to provide additional physical fader playback and submasters, depending upon model, to your NEO lighting control console.

The interconnection between each wing and the control console is via a USB connection and can be powered either directly from your NEO console or plugged directly into a common power outlet through an optional power supply.

We think you will find the NEO lighting control console and wings a worthy successor to a proud history of iconic consoles that have had the honor of bearing the Strand name.

NEO PLAYBACK AND SUBMASTER WINGS
