

Vision.net

Vision.net to DMX512 Interface

The Vision.net DMX512 Interface is a separate interface card that allows the Vision.net system to communicate with any third party DMX512 compatible product. Such products could include dimmer racks, LEDs, and automated luminaires. Such a powerful interface to all DMX512 devices on a single system greatly simplifies the systems control needs.

Features

- Communicates with Vision.net and DMX512 Protocols
- Multiple Vision.net Inputs (2)
- DMX512 Input (1)
- DMX512 Output (1)
- Addressable via Rotary Switch
- Level Snapshots to Recordable Presets
- Configured Utilizing Vision.net Designer Software
- Powered by Either the Vision.net LAN or 24VDC
