Graham, Swift & Company Choose Philips Strand Lighting

The Buford Community Center, Town Park and Theatre is a state-of-the-art facility designed by BRPH architectural and engineering firm. The facility features banquet and meeting space, an outdoor amphitheater, the new home of the Buford Museum, plus the 290-seat Sylvia Beard Theatre. Complete with orchestra and balcony seating, plus VIP boxes, the Sylvia Beard Theatre portion of the new venue was designed by Graham, Swift and Company and is the perfect setting for local and touring theatrical performances, orchestra presentations, dance, or comedy shows, and it's controlled with an Insulated Gate Bipolar Transistor (IGBT) dimming system and a Palette VL control console from Philips Strand Lighting.

LED Ghostlights Shine for Behind the Scenes

Working to support Behind the Scenes, Philips Strand Lighting and Philips Selecon have donated USB LED ghostlights which are now being sold by The ESTA foundation to raise funds for the financial support of entertainment technology industry professionals who are ill or injured. To date, Philips Strand Lighting and Philips Selecon have donated 250 USB LED ghostlights which have raised a total \$10,000 to support those affected by illness or tragedy.

A Great Relationship Built Through Light

When Lighting Designer Mike Flack and Engineer Skip Glasco decided they needed a system upgrade at HSN TV, they could have chosen products from any company they desired. What they chose was a C21 Dimming System, Palette Control Consoles, and PL3 LED Wash luminaires from Philips Strand Lighting and Philips Selecon.

SPX Zoom Profiles are Model Fixture for Fashion Week

The SPX Zoomspot Profile has made a splash on the catwalk for Africa Fashion International (AFI) Fashion Week. Lighting designer Mauritz Jacobs specified the luminaires because of the accuracy with which they control light distribution, the well-defined beam and because there is never any unwanted light spill.
